PROFESSIONAL SUMMARY

Final-year B.E. student specializing in Artificial Intelligence and Machine Learning with strong skills in Python, NLP, chatbot development, and data analysis. Experienced in building AI-driven academic chatbots, voice-based disease detection systems, and sustainability-focused AI solutions through internships and hackathons.

EDUCATION

2022 - 2026

- B.E. in Artificial Intelligence and Machine Learning**
JNN College Of Engineering, Shimoga.
CGPA: 8.81

2020- 2022

- Class XII (Pre-University)**
Akshara PU College, Shikaripura.
Percentage: 90.83%

2020

- Class X (Secondary Education)**
Banasiri Lions High School, Shikaripura.
Percentage: 95.84%

SKILLS

- Programming Languages: Python
- Artificial Intelligence / Machine Learning: NLP, Classification, Feature Extraction, Model Evaluation, AutoML, Pytorch.
- Libraries & Frameworks: NumPy, Pandas, Matplotlib, Seaborn.
- Web Technologies & UI: HTML, CSS, JavaScript, Streamlit.
- Data Visualization: Power BI, Tableau.
- Tools & Platforms: Git, GitHub, Postman, Figma(Beginner).

PROJECTS

1. ClassConnect - AI-Driven Academic Chatbot

- Developed an AI-driven academic chatbot to enable question answering from PDF-based study materials
- Implemented intent-based query handling to support both short-answer and descriptive responses.
- Integrated text and image retrieval to extract relevant diagrams from lecture notes.
- Built an interactive web interface using Streamlit to improve usability for students and educators.

2. Personal Portfolio Website

- Built a responsive portfolio website using React.js, HTML, CSS, and JavaScript.
- Showcased projects, skills, hackathons, and certifications through an interactive interface.
- Applied modern UI/UX principles and component-based development.

INTERNSHIP EXPERIENCE

1 AI Intern – AI with Green Technology (AICTE)

[December, 2024] – [January, 2025]

Completed a one-month internship applying artificial intelligence concepts to support sustainable and green technology solutions.

2 Audio Intelligence and Signal Processing Intern – Manodayam Private Ltd

[August, 2025] – [May, 2026]

- Developing a Parkinson's disease detection system using voice-based audio analysis and machine learning techniques.
- Extracting and preprocessing audio features for supervised classification tasks.
- Training and evaluating classification models using FLAML AutoML for automated model selection and hyperparameter tuning.
- Improving model reliability through iterative testing and validation.

HACKATHONS & TECHNICAL EVENTS

- Participated in **HackTechFusion 2.0**, a 24-hour hackathon at Bapuji Institute of Engineering & Technology, focusing on problem-solving and team collaboration.
- Served as **Event Manager**, ACM Student Chapter, organizing and coordinating technical events to promote skill development and peer collaboration.
- Participated in SHE Secure 2025, a national-level virtual hackathon, developing **SHEvolve**, an AI-powered career empowerment platform for women.
- Participated in the Data Analytics Program (2025) organized by Intel, Blink Foundation, and DIYA, and developed **Textify+**, a tool for text extraction, translation, and text-to-speech automation.
- Coordinated **Monaithon 2025** Hackathon, managing event logistics, participant engagement, and cross-team coordination.

LANGUAGES

- English: Professional Proficiency
- Kannada: Native Proficiency
- Hindi: Intermediate Proficiency

CERTIFICATIONS

- **Deloitte Data Analytics Job Simulation** (Forage, Jan 2026) – Completed practical tasks in data cleaning, visualization, and business insight generation for executive decision-making.
- **Tata Data Visualization Job Simulation** (Forage, Jun 2026) – Completed practical tasks in data visualization, business analysis, and insight communication to support data-driven decision-making.
